

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A gaming device comprising:
a plurality of selection groups;
a plurality of selections in each of said selection groups;
a plurality of advances adapted to be associated with the selections, wherein at least one selection of each of the different selection groups has one of said advances associated with said selection;
a number of picks from the selection groups adapted to be provided to a player;
an advance award adapted to be provided to the player if:
(a) the player picks one of the selections with an associated advance,
(b) said advance automatically causes the pick of one of the selections associated with a subsequent one of the selection groups, and
(c) another one of the advances is associated with said selection caused to be picked by the advance; and
a display device adapted to display the selection groups, advances and advance award.

Claim 2 (currently amended): The gaming device of Claim 1, wherein if the player picks one of the selections associated with one of the advances, said pick caused by said advance does not count against the number of picks.

Claim 3 (original): The gaming device of Claim 1, which includes links between selections of two selection groups, wherein each selection associated with a first one of the selection groups is linked to one of the second selections from a second one of the selection groups, and any advance associated with any one of the selections of the first

selection group causes the pick of the selection in the second selection group which is linked to said selection in the first selection group.

Claim 4 (original): The gaming device of Claim 3, wherein the display device is adapted to display the selection groups in alignment to show the links between selections of the two selection groups.

Claim 5 (currently amended): The gaming device of Claim 1, wherein a plurality of the advances are adapted to be associated with ~~of~~ a plurality of the selections in at least one of the selection groups.

Claim 6 (original): The gaming device of Claim 1, wherein the selection groups are arranged in an order and a percentage of advances associated with the selections decreases for each subsequent selection group.

Claim 7 (original): The gaming device of Claim 1, which includes at least one award associated with one of the selections of one of the groups, wherein said award is adapted to be provided to the player if the player picks said selection or an advance causes the pick of said selection.

Claim 8 (original): The gaming device of Claim 1, which includes a plurality of awards associated with a plurality of the selections of one of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 9 (original): The gaming device of Claim 1, which includes a plurality of awards, one of said awards associated with one of the selections of each of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 10 (original): The gaming device of Claim 1, which includes a plurality of awards associated with a plurality of the selections of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 11 (original): The gaming device of Claim 1, which includes a plurality of awards, wherein each selection not having an associated advance has one of said awards associated with said selection, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 12 (original): The gaming device of Claim 1, wherein the number of picks is reset upon picking one of the selections having an associated advance.

Claim 13 (currently amended): A gaming device comprising:
a plurality of selection groups;
a plurality of selections in each of said selection groups;
a plurality of advances adapted to be associated with the selections, wherein at least one selection of each of the different selection groups has one of said advances associated with said selection;
a number of picks from the selection groups adapted to be provided to a player;
an award adapted to be provided to the player if:
(a) the player picks one of the selections with an associated advance,
(b) said advance automatically causes the pick of one of the selections associated with a subsequent one of the selection groups, and
(c) another one of the advances is associated with said picked selection caused to be picked by the advance, and at least one pick is remaining; and
a display device adapted to display the selection groups, advances and award.

Claim 14 (currently amended): The gaming device of Claim 13, wherein if the player picks one of the selections associated with one of the advances, said pick caused by said advance does not count against the number of picks.

Claim 15 (original): The gaming device of Claim 13, which includes links between selections of two selection groups, wherein each selection associated with a first one of the selection groups is linked to one of the second selections from a second one of the selection groups, and any advance associated with any one of the selections of the first selection group causes the pick of the selection in the second selection group which is linked to said selection in the first selection group.

Claim 16 (original): The gaming device of Claim 15, wherein the display device is adapted to display the selection groups in alignment to show the links between selections of the two selection groups.

Claim 17 (currently amended): The gaming device of Claim 13, wherein a plurality of the advances are adapted to be associated with ~~of~~ a plurality of the selections in at least one of the selection groups.

Claim 18 (original): The gaming device of Claim 13, wherein the selection groups are arranged in an order and a percentage of advances associated with the selections decreases for each subsequent selection group.

Claim 19 (original): The gaming device of Claim 13, which includes at least one award associated with one of the selections of one of the groups, wherein said award is adapted to be provided to the player if the player picks said selection or an advance causes the pick of said selection.

Claim 20 (original): The gaming device of Claim 13, which includes a plurality of awards associated with a plurality of the selections of one of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 21 (original): The gaming device of Claim 13, which includes a plurality of awards, one of said awards associated with one of the selections of each of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 22 (original): The gaming device of Claim 13, which includes a plurality of awards associated with a plurality of the selections of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 23 (original): The gaming device of Claim 13, which includes a plurality of awards, wherein each selection not having an associated advance has one of said awards associated with said selection, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 24 (original): The gaming device of Claim 13, wherein the number of picks is reset upon picking one of the selections having an associated advance.

Claim 25 (currently amended): A gaming device comprising:
a plurality of selection groups;
a plurality of selections in each of said selection groups;
a plurality of advances adapted to be associated with the selections, wherein at least one selection of each of the different selection groups has one of said advances associated with said selection;
a number of picks from the selection groups adapted to be provided to a player;
an award adapted to be provided to the player if for each of two picks by the player:

- (a) the player picks one of the selections with an associated advance,
 - (b) said advance automatically causes the pick of one of the selections associated with a subsequent one of the selection groups, and
 - (c) another one of the advances is associated with said selection caused to be picked by the advance; and
- a display device adapted to display the selection groups, advances and award.

Claim 26 (currently amended): The gaming device of Claim 25, wherein if the player picks one of the selections associated with one of the advances, said pick caused by said advance does not count against the number of picks.

Claim 27 (original): The gaming device of Claim 25, which includes links between selections of two selection groups, wherein each selection associated with a first one of the selection groups is linked to one of the second selections from a second one of the selection groups, and any advance associated with any one of the selections of the first selection group causes the pick of the selection in the second selection group which is linked to said selection in the first selection group.

Claim 28 (original): The gaming device of Claim 27, wherein the display device is adapted to display the selection groups in alignment to show the links between selections of the two selection groups.

Claim 29 (currently amended): The gaming device of Claim 25, wherein a plurality of the advances are adapted to be associated with ~~of~~ a plurality of the selections in at least one of the selection groups.

Claim 30 (original): The gaming device of Claim 25, wherein the selection groups are arranged in an order and a percentage of advances associated with the selections decreases for each subsequent selection group.

Claim 31 (original): The gaming device of Claim 25, which includes at least one award associated with one of the selections of one of the groups, wherein said award is adapted to be provided to the player if the player picks said selection or an advance causes the pick of said selection.

Claim 32 (original): The gaming device of Claim 25, which includes a plurality of awards associated with a plurality of the selections of one of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 33 (original): The gaming device of Claim 25, which includes a plurality of awards, one of said awards associated with one of the selections of each of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 34 (original): The gaming device of Claim 25, which includes a plurality of awards associated with a plurality of the selections of the groups, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 35 (original): The gaming device of Claim 25, which includes a plurality of awards, wherein each selection not having an associated advance has one of said awards associated with said selection, wherein the player is provided each award associated with the selections picked by the player and the selections caused to be picked by the advance.

Claim 36 (original): The gaming device of Claim 25, wherein the number of picks is reset upon picking a selection having an associated advance symbol.

Claim 37 (currently amended): A gaming device comprising:
a plurality of selection groups;
a plurality of selections in each of said selection groups;
a plurality of advances adapted to be associated with the selections, wherein at least one selection of each of the different selection groups has one of said advances associated with said selection;

a number of picks from the selection groups adapted to be provided to a player;
an advance award adapted to be provided to the player if:

- (a) the player picks one of the selections with an associated advance,
- (b) said advance automatically causes the pick of one of the selections associated with a subsequent one of the selection groups,
- (c) a second one of the advances is associated with said selection caused to be picked by the advance, and;
- (d) said second advance automatically causes the pick of one of the selections associated with a subsequent one of the selection groups or the advance award; and

a display device adapted to display the selection groups, advances and advance award.

Claim 38 (currently amended): A gaming device comprising:
a plurality of first selections;
a first advance associated with one of the first selections;
a plurality of second selections, wherein each of the first selections is individually associated with one of the second selections;
an advance award adapted to be provided to a player if the first selection picked generates the first advance and the first advance automatically causes the second selection associated with the picked first selection to be picked wherein the second selection generates a second advance ~~is generated by the second selection associated with the picked first selection and provided via the first advance~~; and
a display device operable to display said first selections, first advance, second selections, second advance and advance award.

Claim 39 (original): The gaming device of Claims 38, which includes at least one award associated with one of the first selections.

Claim 40 (original): The gaming device of Claim 38, wherein the associations between the first selections and second selections are displayed by the display device as an alignment of the first and second selections.

Claim 41 (original): A method of operating a gaming device including a wagering game, said method comprising:

- (a) enabling a player to pick from a first selection group until the player picks a first advancement;
- (b) if the first advancement does not generate a second advancement in a second selection group, enabling the player to pick from the second selection group until the player picks the second advancement in the second selection group; and
- (c) providing an advance award to the player for advancing through each of the groups if a number of picks used to advance through the groups is less than or equal to a provided number of picks.

Claim 42 (original): The method of Claim 41, which includes providing a separate number of picks for the first and second selection groups.

Claim 43 (currently amended): The method of Claim 41, which includes requiring at least one pick to be used ~~use~~ to receive the award.

Claim 44 (original): The method of Claim 41, which includes, upon the picking of first advancement, automatically revealing one of the selections in the second group, wherein the automatically revealed selection can yield the second advancement.

Claim 45 (original): The method of Claim 44, wherein the automatically revealed selection in the second group is related to the selection in the first group that yielded the first advancement.

Claim 46 (original): The method of Claim 44, wherein the automatically revealed selection in the second group is randomly chosen upon picking the first advancement.

Claim 47 (original): The method of Claim 41, which includes not counting a pick in the second group that yields the second advancement if the pick is a result of a pick of the first advancement in the first group.

Claim 48 (original): The method of Claim 41, which includes providing steps (a) to (c) via a data network or a computer storage device.

Claim 49 (original): The method of Claim 48, wherein the data network includes an internet.

Claim 50 (currently amended): A method of operating a gaming device, said method comprising:

- (a) enabling a player to pick from a first selection group until the player picks a first advancement;
- (b) if the first advancement does not generate a second advancement in a second selection group, enabling the player to pick from the second selection group until the player picks the second advancement; and
- (c) providing an advance award to the player for advancing through the groups within a designated ~~specification~~ number of player picks, wherein a second advancement is obtained without counting against the number of picks if it is generated directly after the first advancement is generated.

Claim 51 (original): The method of Claim 50, which includes, upon picking the first advancement, automatically revealing one of the selections in the second group, wherein the automatically revealed selection can yield the second advancement.

Claim 52 (original): The method of Claim 51, wherein the automatically revealed selection in the second group is related to the selection in the first group that yielded the first advancement.

Claim 53 (original): The method of Claim 51, wherein the automatically revealed selection in the second group is randomly indicated by the first advancement.

Claim 54 (original): The method of Claim 50, which includes providing steps (a) to (c) via a data network or a computer storage device.

Claim 55 (original): The method of Claim 54, wherein the data network includes an internet.
